Java

```java
class Solution {
    public double averageWaitingTime(int[][] customers) {

    }
}
```

JavaScript

```javascript
/**
 * @param {number[][]} customers
 * @return {number}
 */
var averageWaitingTime = function(customers) {

};
```

TypeScript

```typescript
function averageWaitingTime(customers: number[][]): number {

};
```

C++

```cpp
class Solution {
public:
```

```cpp
    double averageWaitingTime(vector<vector<int>>& customers) {

    }
};
```

C#

```csharp
public class Solution {
    public double AverageWaitingTime(int[][] customers) {

    }
}
```

Kotlin

```kotlin
class Solution {
    fun averageWaitingTime(customers: Array<IntArray>): Double {

    }
}
```

Go

```go
func averageWaitingTime(customers [][]int) float64 {

}
```
